

Guidelines for the use of panquiz.com

Panquiz! Is a free online App online which creates educational questionnaires, quizzes, tests and training verifications in a simple and fast way. www.panquiz.com

What you need to play:

1 pc or laptop to run the quiz

1 smartphone, tablet o pc for each participant, it will work as a remote control to answer questions.

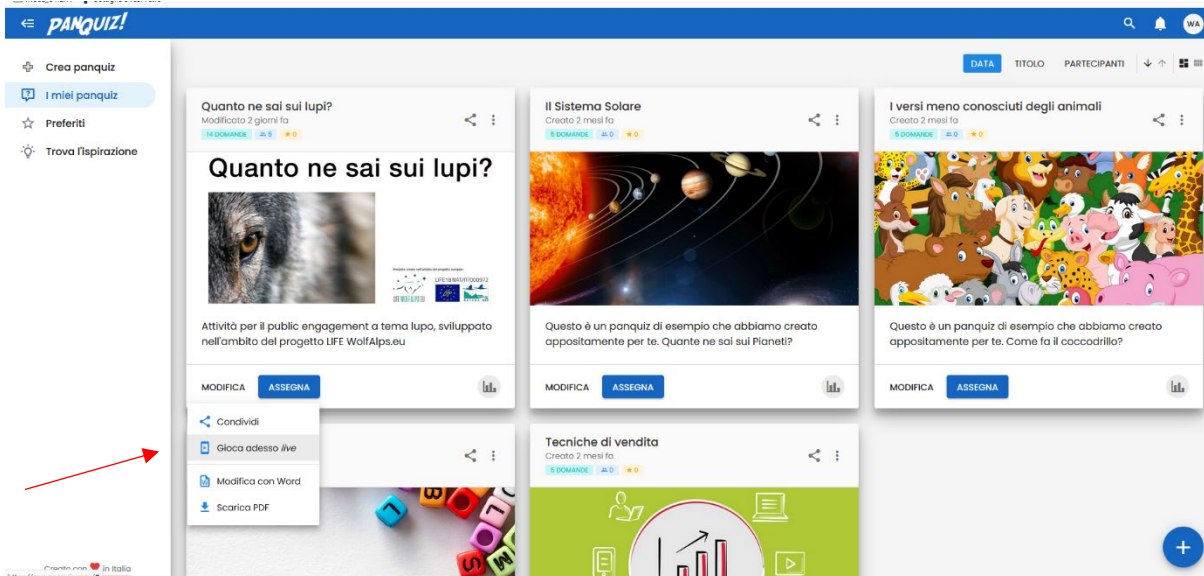

How does it works

The quiz must be managed by a moderator (it can be a teacher, animator, educational operator, speaker....) who must have a panquiz account.

The account is free and allows both to create new quizzes and to use or modify those already present.

The moderator launches the chosen quiz, with "assign" ("assegna")- "play live" – ("gioca live")
THE QUIZ IS IN THE CHOSEN LANGUAGE BUT THE PLATFORM IS IN ITALIAN:

If you want to turn the APP in English language, you have to scroll till the end of the first webpage (before login page) and on the right you find "English".

It can be used on a large screen (for example a video projector, a LIM or a TV), obviously connected to the Internet.

It can also be played live online by sharing the screen with programs such as teams or meet.

Once the quiz is launched, a **PIN** appears.

Attention: **the pin is unique for each game session**, and changes every time that we launch the quiz. In this way the quiz can be played simultaneously in different locations and in different sessions.

Participants **will need to connect with their device to play.panquiz.com**. No registration is required for this operation. You can also download the PanQuiz! APP, which is recommended.

Connecting to play.panquiz.com this screen will appear, in which each participant must enter the **PIN of the game** and their nick name.

ENTER HERE THE PIN OF THE GAME TO PARTICIPATE

After entering PIN and nick name, the name of the participant is displayed on the screen of the moderator, who decides to start the game when all participants will be connected, clicking on "inizia" (which means "start")

Pronti a partecipare?
Vai a play.panquiz.com oppure scarica l'app PanQuiz!

PIN: **32 32 00**

INIZIA

The moderator manages the progress of the questions. With each question you can stop to explain the correct answer.

Participants answer by clicking the symbol and color associated with the 4 possible answers.

If I find these tracks, what does it mean?

Notes

Audio

It is possible to shut down the audio by clicking in the first window on the symbol on the right.

Disconnection and other issues

The system tries to keep the connection during the course of the game. If the participant's phone shuts down (for example, the display shuts down), the phone enters standby mode and interrupts the connection (it is the phone that interrupts it, not Panquiz!). When the phone is reactivated, Panquiz! tries to reactivate the connection but success depends on the phone's performance. It may not reconnect and/or require a new PIN to participate. The new PIN does not allow you to join the same game (each PIN leads to a different game session). Unfortunately, nothing can be done and the outgoing person will not be able to participate in the game.

This problem doesn't occur using the free ANQUIZ APP! We recommend downloading the PANQUIZ APP! On Googleplay or App Store (free).
